

Compass

It is a known fact that employee engagement should be a top priority for employers now and in the future. This can prove challenging to achieve, but we can help you to get there.

Buck Consultants introduces you to Compass, the online portal that bridges technology and communication to offer one solution. Compass enables our clients to talk to employees about their total reward, pensions, flexible benefits and career through a cost and time-efficient vehicle.

➤ 360° outlook

Compass is more than a traditional flexible benefits and total reward platform. Compass brings a modern dimension to employee engagement. Human resource and compensation leaders can use technology to nurture employees' decision-making as they plan for their future in the workplace and later on in life.

➤ Tailored for you

Compass is brought to our clients by leaders in technology, administration, human resources and communication. No matter the size of the company, our consultants offer a tailored online solution that fits your organisation in your industry.
